1 point possible Essay

Describe what business process reengineering (BPR), business process improvement (BPI) and business process management (BPM) entail.

Maximum 200 words.

Business Process Reengineering (BPR) is the radical, integrative redesign of core processes to achieve dramatic performance improvements, whereas Business Process Improvement (BPI) involves incremental, continuous adjustments to existing workflows to enhance efficiency. And Business Process Management (BPM) is a holistic, ongoing point of view that governs the entire processes lifecycle, including steps such as modeling, execution, and monitoring, to ensure they align suitably with organizational goals.

1 point possible Essay

Compare business process reengineering (BPR) with business process improvement (BPI). What are the advantages and disadvantages of both approaches to process improvement?

Maximum 150 words.

Business Process Improvement (BPI) focuses on incremental, continuous optimization of existing workflows to enhance efficiency, while Business Process Reengineering (BPR) involves a radical, fundamental redesign of processes from scratch to achieve considerable performance advances.

In my humble opinion, I am going to present main advantages and disadvantages of both approaches, from my own point of view.

- Business process reengineering (BPR):
 - Pros:
 - It is further and we could see its results sooner.
 - Cons:
 - It is expensive, hence it will request a larger amount of money.
 - It is disruptive and it generates change resistances, so a bigger effort and considerable dedication will be needed to convince and enroll company's staff.
 - It could become unsustainable in the time.
- Business Process Improvement (BPI):
 - Benefits:
 - It is cheaper, sustainable and scalable, because of we could split its costs in small correlative batches.
 - Difficulties:
 - It is difficult to manage.
 - Difficult to perceive.
 - Staff must be enroll.

Watch the video "Continuous process improvement" by Penny Weller at TEDxKalamazoo

The textbook explains that in BPI processes – besides employees directly involved in the process – other individuals, such as customers, can also play an important role. In this [video](https://youtu.be/1hvprBVWn3M?si=o2rmLTU0-T7g26ef)  (<https://youtu.be/1hvprBVWn3M?si=o2rmLTU0-T7g26ef>), Penny Weller highlights the importance of business process improvement (BPI) and the role of different stakeholders in initiating improvements. Watch the video below on BPI and answer the questions. There will be no questions asked about the content of the video in the exam, but it helps to understand the theory of this theme.

1 point possible Essay

To what extent do the recommendations include the DMAIC steps (define, measure, analyse, improve, control)?

Maximum 150 words.

We need to do all its steps, including maesure and control, because skiping some of them represents the main failure cause in majority of companies or projects.
