1 point possible Essay

What are the categories of societal ethical issues surrounding information systems and information technology? Give examples of ethical issues for each of these categories.

Maximum 150 words.

The four main categories (often known as the PAPA framework) are:

- Privacy: What information about oneself must a person reveal to others?
  - *Example:* Companies collecting and selling user location data without explicit consent.
- Accuracy: Who is responsible for the authenticity, fidelity, and correctness of information?
  - *Example:* Erroneous algorithms producing wrong credit scores or false criminal matches.
- Property: Who owns the information, and who controls software or data rights?
  - *Example:* Software piracy, copyright infringement, or unauthorized training of AI on proprietary art.
- Accessibility: Who has the right to access information, and under what conditions?
  - *Example:* The digital divide, where low-income regions lack access to high-speed internet or digital public services.

Case study: Proctoring

The learning objective for the next assignment is about recognising/applying theoretical concepts in practical situations. You will find more of these kinds of assignments in this course. In the exam, these learning objectives are tested with open-ended questions on an example or short case study.

Instruction

Read the case study on **Proctoring (https://aula.uoc.edu/courses/88500/files/13618479?wrap=1&instfs_id=ea48cbce-22da-44cb-8751-f4aec58e29ec&verifier=ea2fd23d-95c0-41b3-ab61-27c46a89134a&access_token=eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzUxMiIsImtpZCI6Im5ldy1xdWl6em-9j7eSCzIy2qaH3w)** **(https://aula.uoc.edu/courses/88500/files/13618479/download?instfs_id=ea48cbce-22da-44cb-8751-f4aec58e29ec&verifier=ea2fd23d-95c0-41b3-ab61-27c46a89134a&access_token=eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzUxMiIsImtpZCI6Im5ldy1xdWl6em-9j7eSCzIy2qaH3w&download_frd=1)** and work out the accompanying questions in *max. 300 words.*

A standard step-by-step elaboration of the case can be found in the feedback. You can use this **rubric (https://aula.uoc.edu/courses/88500/files/13618484?wrap=1&instfs_id=47ea0a33-dbd5-47a3-b0c7-4a11597c3c0e&verifier=982d73aa-ccb6-445a-a7f1-9d58e6a83661&access_token=eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzUxMiIsImtpZCI6Im52_vtRhPJukUZ8bWpVnTGQrKs_w-vMX66dKeycfwQkl4abad9FsGnfRD9mMMF5BUh1VYw)** **(https://aula.uoc.edu/courses/88500/files/13618484/download?instfs_id=47ea0a33-dbd5-47a3-b0c7-4a11597c3c0e&verifier=982d73aa-ccb6-445a-a7f1-9d58e6a83661&access_token=eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzUxMiIsImtpZCI6Im52_vtRhPJukUZ8bWpVnTGQrKs_w-vMX66dKeycfwQkl4abad9FsGnfRD9mMMF5BUh1VYw&download_frd=1)** to compare your own answer with the standard elaboration.

Study instructions

Case study questions relate to applying/recognising theoretical concepts in practical situations.

Explanations on how to approach such questions can be found [**here (https://aula.uoc.edu/courses/88500/files/13618481?wrap=1&instfs_id=347b39ee-5fa8-**

2 1 point possible Essay

Explain the ethical issue around proctoring:

- Who are the stakeholders and what are their values or interests?
- To which category/categories does this ethical issue belong?

Maximum 300 words.

Online proctoring software is used to monitor students remotely during exams using webcams, microphones, and screen tracking. It raises key ethical concerns regarding student rights, fairness, and system reliability.

Considering stakeholders and their Values/Interests:

- For students: They value privacy, fairness, personal dignity, and equal opportunity. They worry about intrusive video recording of their home, algorithmic bias (for example, when facial recognition could fail on darker skin tones), and technical glitches or bugs which could cause false failure accusations.
- For educational Institutions & Faculty: They value academic integrity, valid assessment results, institutional reputation, and preventing cheating efficiently.
- Proctoring Software Vendors: Value commercial profit, market expansion, product efficacy, and intellectual property protection.

Regarded, relevant and involved Ethical Categories:

1. Privacy: Software collects sensitive biometric, visual, and behavioral data inside a student's personal living environment.
2. Accuracy: Automated algorithms can make incorrect judgments, mistakenly flagging natural head movements or eye shifts as academic misconduct.
3. Accessibility: Students with limited internet speed, older hardware, or disabilities face unfair technical barriers or false flags compared to peers.
